

LH

Halogen-free flame-retardant polyolefin corrugated tubes pre-wired with high-security halogen-free cables.

Uses

Pre-wired tube for the connection of analog and conventional fire detection and alarm systems in public places.

Short wiring pitch (twisted 25 turns per meter) to reduce external interference.

Characteristics

Fire behaviour	Non flame propagation	Bending resistance	Pliable/ Transversely elastic
Dimensions	UNE-EN 60423	Impact resistance	Middle: 2J
Standard	UNE-EN 61386-22	Maximum temperature	90°C
Electrical properties	Insulating	Minimum temperature	-5°C
Compressive strength	Middle: 750N	Cable type	SOZ1-K
